

Job announcement

Unique opportunity for talented C/C++ developer

Hell yeah, it's rocket science!

Do you write code that is out of this world? Do you think there's more to life than building corporate mobile apps? Want to see your code in use on the Moon? Then we might have just the job for you! PTScientists is a Berlin-based space company with plans to land the first private mission on the Moon. We are adding to our rapidly expanding team and we have an opening for a talented C/C++ developer to help us build applications for our Audi lunar quattro Moon rovers and our lunar landing module.

Your qualities:

We're especially interested in people with experience of embedded C/C++ programming and real-time operating systems. If that sounds like you, please get in touch with us!

Our conditions:

We need someone who is able to commit to working at least 20 hours/week. You should live in Berlin or the surrounding area, as our office is based in Berlin-Marzahn. The salary is negotiable and dependent on your skills and experience.

Interested?

Send us your CV and salary expectations to jobs@ptscientists.com. Please mention the reference code **AP#SW003** in your application.

We are looking forward to hearing from you!
